

How to Use BeeyLive for Live Interpretation

Step 1 – Scan the QR Code

Scan the QR code using your smartphone's camera app, or open the following link in your browser:

<https://fdiwdc2026.beey.live/>

The QR code and the link both lead to the same website.

Step 2 – Open the Link

Tap the notification or link to open the landing page in your web browser. If you are using an iPhone, we recommend opening the link in Chrome.

Step 3 – Select Your Language

On the landing page, choose your preferred language by tapping the corresponding button.

Beey AI - Your AI Assistant

Select the language of interpretation:

Čeština	Português
English	Türkçe
Deutsch	العربية
Polski	中文
Magyar	한국어
Français	日本語
Español	Українська
Italiano	Русский

How to use Beey AI ?

Share your feedback →

Live interpretation provided by **Beey.ai** from
NEWTON Technologies.

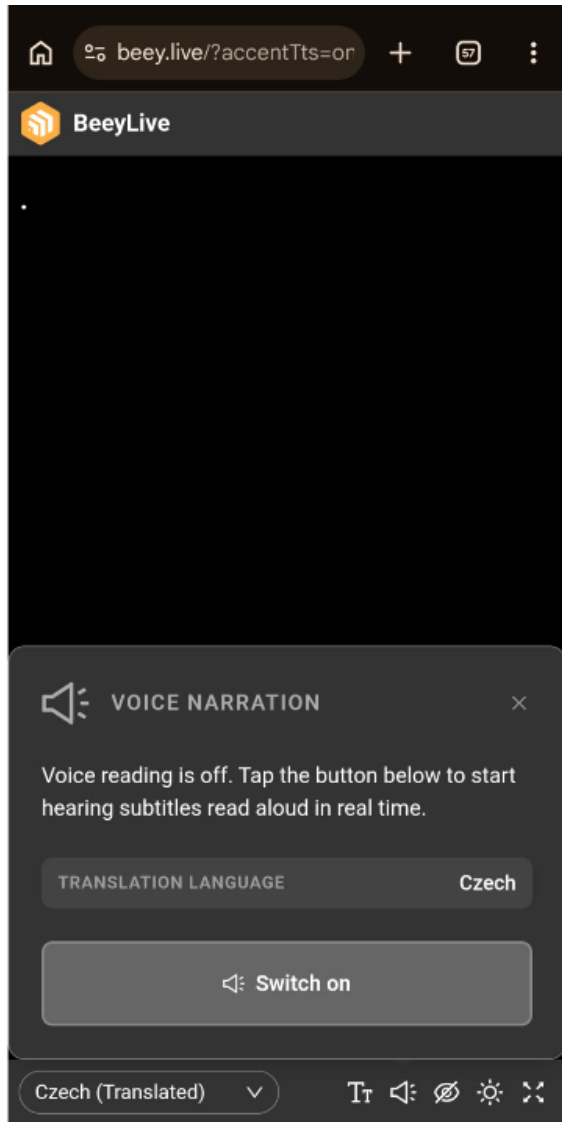

Step 4 – View Live Translated Subtitles

After selecting your language, live translated subtitles will automatically appear on your screen once the conference starts.

Step 5 – Enable Audio Interpretation

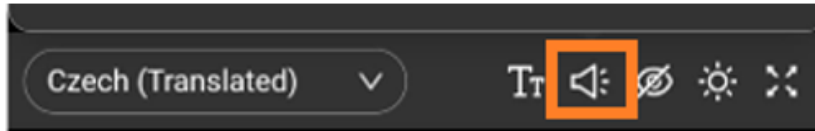

To listen to the live interpretation in your selected language, connect your headphones to your device and tap the **“Switch on”** button. The live interpretation will be played through your headphones.

Note:

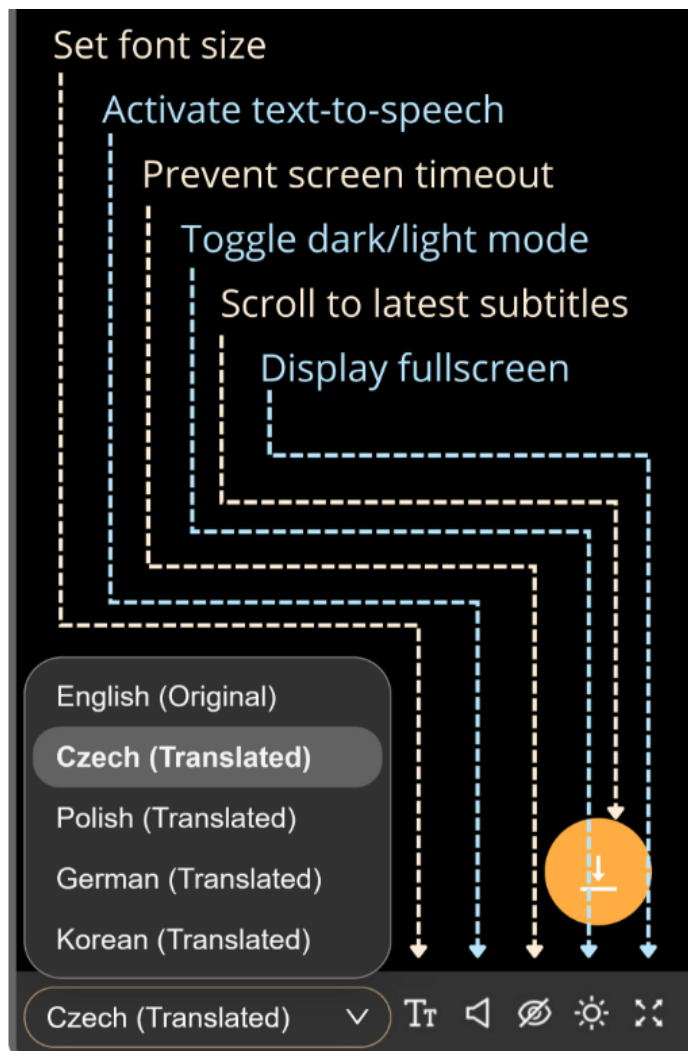

If you accidentally close the window where you can enable interpretation in your language, tap the speaker icon in the bottom-right corner. The window will appear again, and you can tap the **“Switch on”** button to start the audio interpretation through your headphones.

To stop the audio interpretation, tap the speaker icon and then tap the **“Switch off”** button.

The interpretation audio may not start immediately after you tap **"Switch on"**. A short delay is normal, as the system needs to gather enough context to provide a more accurate interpretation.

Additional information on how to customize BeeyLive using the icons on the bottom bar – see the image below. You can also change the language by tapping the arrow next to the currently selected language in the bottom-left corner – a list of available languages will appear.

Quick Guide

- Scan the QR code.
- Open the link (for iPhone users, Chrome is recommended).
- Select your preferred language.
- Translated subtitles will appear on screen.
- Connect your headphones and tap **“Switch on”** to hear the live interpretation.
